PROJECTS

PriceSpy/ *Java, HTML, CSS, JS, MYSQL* Apr. 2024 – Present
- **Platform Purpose:** PriceSpy is a product price comparison platform.
- **Supported Websites:** It allows users to compare prices of products on Amazon and Flipkart
- **Data Source:** The system retrieves product details from a pre-inserted database.
- **User Benefit:** Helps users make informed purchasing decisions efficiently.
- **Convenience: Eliminates the need to manually check multiple websites.**
- **Current Focus:** Only supports price comparison; does not include user feedback, live price updates, or direct purchasing options.

Personal Portfolio Website / *HTML CSS, JS* June 2023 – Present
- **Project:** Developed a personal portfolio website.
- **Purpose:** Showcases skills, projects, and experience.
- **Functionality:** Acts as an online resume for visitors to explore past work and contact me.
- **Technology Used:** Built using modern web technologies.
- **Design Focus:** Ensures a professional and responsive user experience.

Oral Cancer Detection/ *Flask , Python ,HTML, CSS, JS,ML* *April* 2025
- **Project:** Developed a web-based oral cancer detection system.
- **Purpose:** Aims to assist in early detection of oral cancer using machine learning models.
- **Functionality:** Users can upload medical images for prediction; provides diagnostic results via a user-friendly interface.
- **Technology Used:** Built with Flask for both frontend and backend; integrates machine learning for image classification.
- **Design Focus:** Clean, intuitive interface to ensure accessibility for both medical professionals and general users.
